Re: Completion Report
Former Bremerton MGP Site

Dear Captain Ferguson:

Enclosed please find the Final Completion Report for the Incident Action and Time Critical Removal Action (the "Removal Action") recently performed by Cascade Natural Gas Corporation ("Cascade") at the Former Bremerton MGP Site. The Completion Report incorporates comments received from the U.S. Coast Guard ("USCG") and the U.S. Environmental Protection Agency. The Completion Report was required by the previously approved Work Plan for the Removal Action.

This confirms that, other than the post-completion inspections scheduled to terminate on or around April 10, 2011, Cascade has completed the Removal Action set forth in the Work Plan in full satisfaction of the Administrative Order for a Pollution Incident issued by the USCG under Section 106 of the Comprehensive Environmental Response, Compensation, and Liability Act.

Cascade appreciates the USCG's support in completing the Removal Action quickly and successfully.

Sincerely,

TUPPER MACK JENSEN WELLS PLLC
